DETAILED ACTION

Drawings

The drawings filed on June 2, 2005 are acceptable subject to correction of the informalities indicated herein. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Figures 14 – 16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1 – 10 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest the limitations of the claims.

Ryhanen shows a micromechanical resonator comprising an inductor (1) and variable capacitor (2) and where the insulating film (5A, B) covering the substrate includes an opening (5A corresponding to the opening in substrate 3) but does not show

Art Unit: 2817

where the resonator electrode is concave toward the opening along the side wall of the opening (where only Fig. 3a is remotely concave, furthermore where the concave section of the electrode is shown with respect only to section 14 and not the opening in the substrate above electrode 8 and where Fig. 3a nor where the concave section of the electrode is concave along the side wall of the opening).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tada ('011) shows a micromachine.

Tada ('587) shows a micromachine.

Ryhanen shows a micromechanical tunable resonator.

This application is in condition for allowance except for the following formal matters:

Objections to the drawings above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dean O. Takaoka whose telephone number is (571) 272-1772. The examiner can normally be reached on 8:30a - 5:00p Mon - Fri.

Art Unit: 2817

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571) 272-1769. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
